Diego Alonso Garcia Guerrero

| Front-End Web Developer

As a recent graduate with a degree in Software Analysis and Development, I am eager to launch my career as a software developer. While I may not have direct experience in the industry, I have honed my skills through coursework and personal projects, and am confident in my ability to bring value to any team. I am a quick learner and have a passion for solving complex problems through code. With a strong foundation in frontend development using HTML, CSS, JavaScript, React.js and Next.js, I am excited to contribute my knowledge and grow as a developer within a dynamic and challenging work environment.

MOST RECENT PROJECTS

Bluebyte ecommerce

TECHNOLOGIES USED

- HTML and CSS
- JavaScript
- Git
- React.js
- Tailwindcss

Project Description

I developed a highly responsive ecommerce web application using React.js and implemented stateful components through React.js hooks. The platform has a sleek design, making it easy for customers to navigate and filter through product categories. The shopping cart system is a standout feature, updated in real-time with a clear breakdown of total order cost. Additionally, a secure payment system and customer account system are integrated for ease of transactions and future purchases. Overall, this ecommerce platform is robust and efficient, delivering seamless shopping experiences to its users.

To-do App

TECHNOLOGIES USED

- HTML and CSS
- JavaScript
- Node.js
- Git

Project Description

The To-Do App is a web-based application that allows users to create and manage their to-do lists. Users can add tasks to their list, mark them as complete, and delete them when they're done. The application is built using HTML, CSS, JavaScript, and Node.js.

SKILLS

- HTML and CSS
- JavaScript
- Node JS
- React
- Next.js
- Tailwindcss
- Git
- Github
